Form PCT/ISA/210 (second sheet) (January 2004)

# INTERNATIONAL SEARCH REPORT

Ü

ational application No. PCT/IB2005/050286

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
1. As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  See annex
Remark on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.

# **★0/588579**IAP11 Rec'd PCT/PTO 04 AUG 2006

## FURTHER INFORMATION CONTINUED FROM PCT/ISAV 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-9

3

Latch circuit comprising a differential input and a differential output, one of the outputs being connected to the input with opposite polarity, and a control input for receiving a control signal for determining a threshold for the input signal, as depicted in figures 1 and 2 of the application.

2. claims: 10-17

Latch circuit adapted for differential input signals comprising first and second latch portions, each latch portion comprising a differential input and a differential output, one of the outputs of each latch portion being coupled to the input having opposite polarity of the other latch portion, each of the latch portions comprising a control input for receiving a control signal for determining a threshold for the input signal, as depicted in figures 3-5 of the application
